

## Attaching Flag Pole on a V-Dock Roll-In & Post Style Dock

Simply install 2 U-Bolts around the square leg of the roll in dock and fasten with (4) 5/16" flange nuts.

Next Slide the flag pole into the round sleeve. Make sure the two plastic washers are installed in between the sleeve and the flag pole. This allows the flag pole to turn when the wind changes direction thus preventing the flag to be wrapped around the flag pole.

For round posts (1 1/4" inside diameter), just remove the cap and slide the flag pole and plastic washers over the post.
