

Post Bracket Instructions

Step 5.

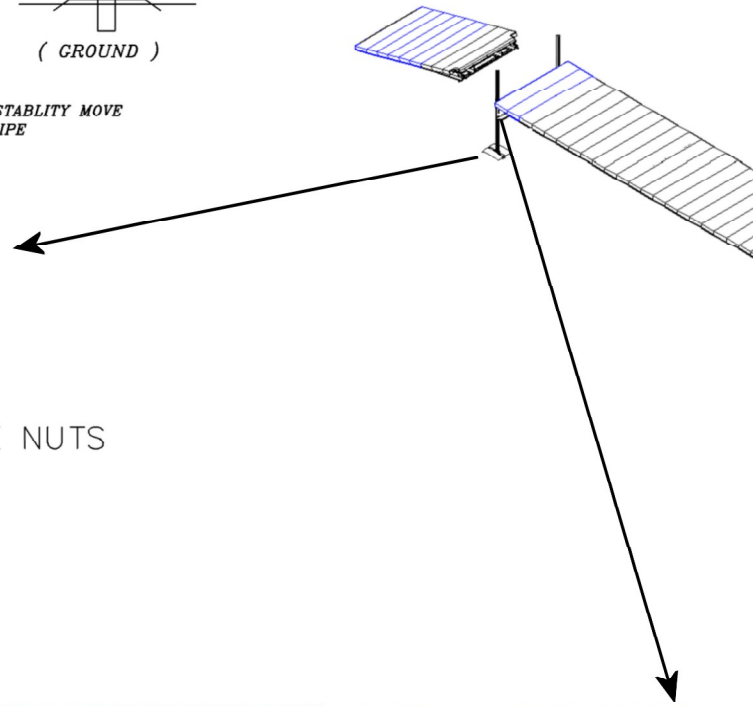

Place the post bracket on the end channel as shown. Make sure the square hole on the post bracket & the end channel are aligned. Fasten with (2) 5/16" x 3/4" hex head bolts & flange nuts

FOOT PAD INSTRUCTIONS

Post Bracket & Fo

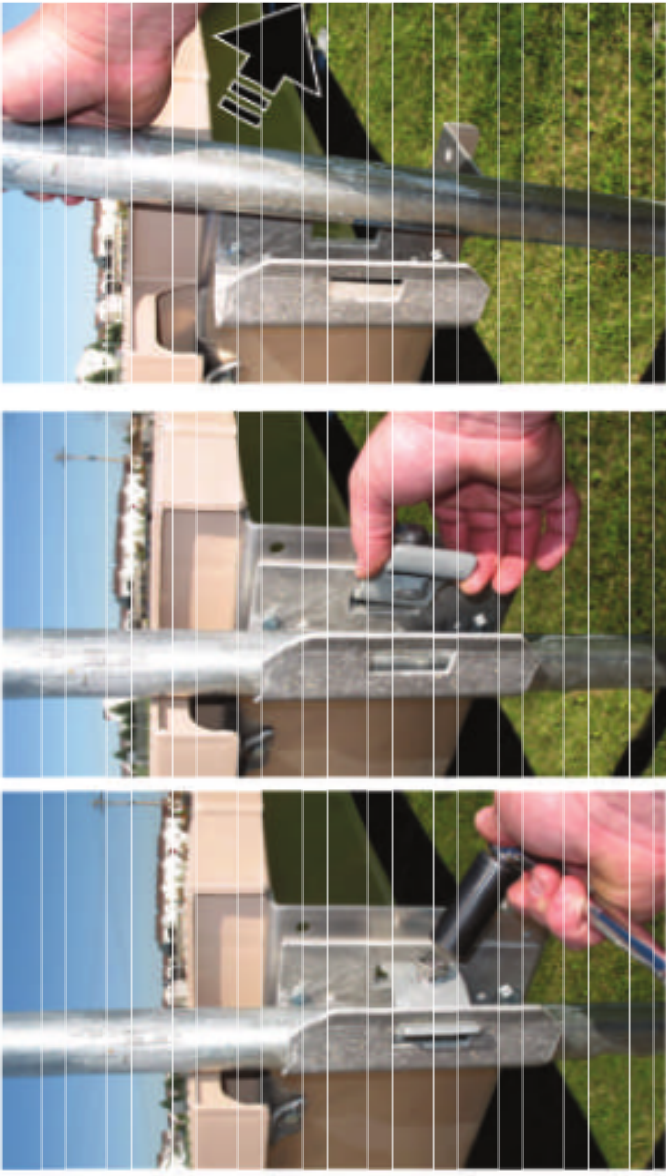

To install or remove post...

**Use a 3/4" wrench to
tighten or remove post bracket lug
This allows the post to be inserted
or removed from the side of the dock
even with the foot pad on the posts.**

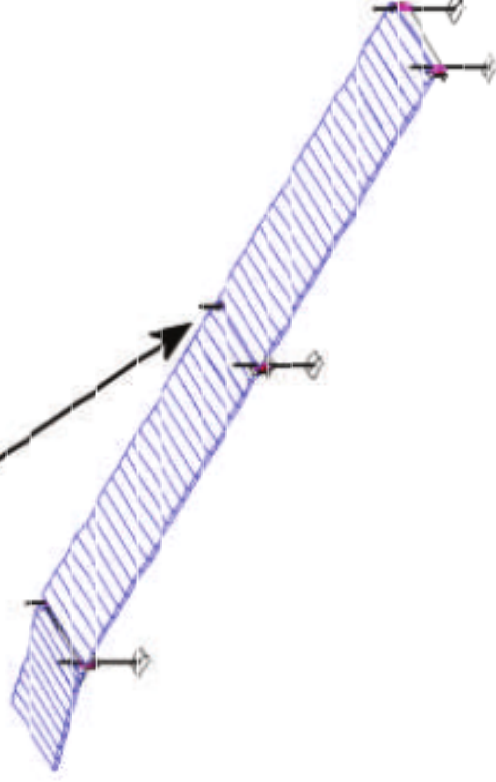

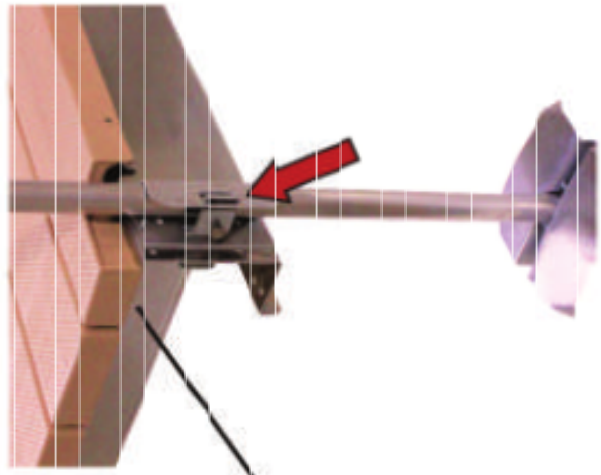

Post Bracket Instructions

On The Last Section...

Rotate iug so the long end is facing in.
(to avoid hitting boats)

Connecting Sections Together

Reverse the iug so the longer end sticks out
allowing the two sections to be plugged together
and held together with a snap pin
